

OCMC Student Guide

This guide will help you get Makers Empire 3D and start making great designs with your friends!

1. Get Makers Empire 3D
2. Log in and complete Basic Training
3. Working with your friends
4. More tips for students

1. Get Makers Empire 3D

The Makers Empire 3D design app is **free to download** and works on almost any device.

Click the button to get Makers Empire 3D for your device.

[Mac](#)

[Android devices](#)

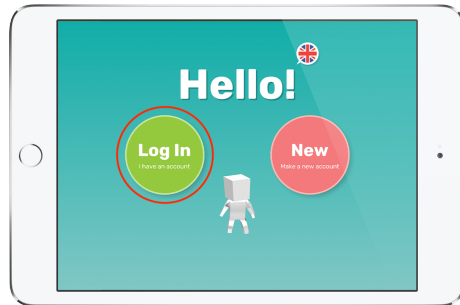

[Windows](#)

For installation on Chromebooks, please check out this [handy guide](#).

2. Log in and complete Basic Training

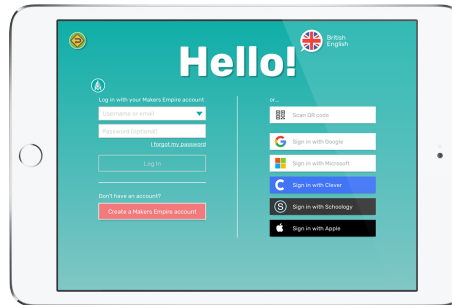

Once you have Makers Empire 3D installed, you can start making amazing 3D designs in just a few minutes!

1. Open Makers Empire 3D

Click the big green Log In button.

2. Log in

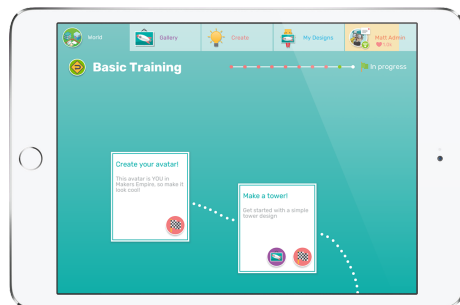

There are a few options. Your teacher will tell you how they want you to log in.

3. Enter the Training Lab

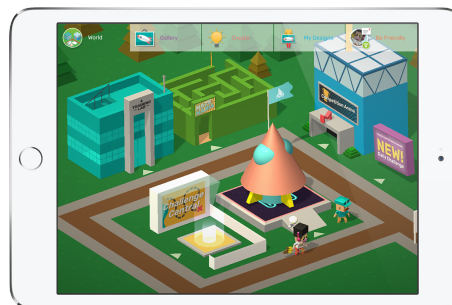

4. Complete Basic Training

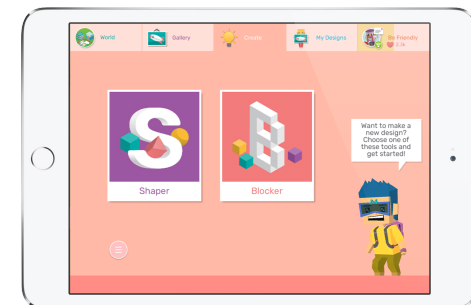

Follow the steps to learn the basic tools and controls, and start making 3D designs

5. The World is yours...

When you complete Basic Training, all of Maker World will be unlocked

6. Create ANYTHING

Click the **Create** button (the light bulb icon on the top of screen) and try to make something with **Shaper** or **Blocker**

TIP! You can go back to **Training Lab** anytime to watch “**How to make...**” videos or try **Pro Training** to learn more advanced techniques.

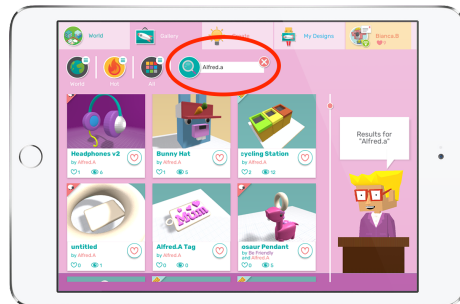

3. Working with your classmates

Learning is more fun when it is shared! In Makers Empire 3D you can leave feedback on your classmate's designs, and you can share designs with each other.

Commenting on designs

Leaving feedback for your classmates is a great way to build their confidence and help them improve their designs.

1. Find your classmates' designs

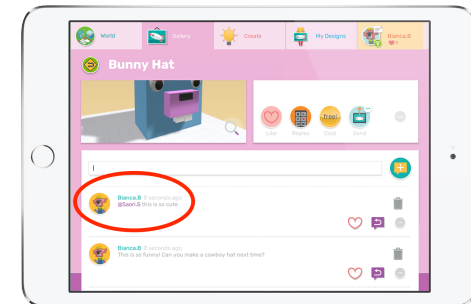

Go to the **Gallery** and search for your classmates by typing their **username**.

2. Leave a message

Say something nice about their design, or leave some positive feedback to help make their design even better

3. Tell more friends

You can include other classmates by using the @ symbol, plus their username

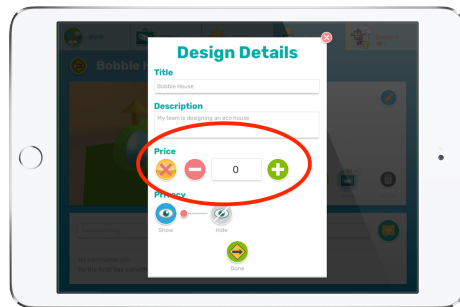

Parents Note: There is no direct messaging or 'chat' in Makers Empire 3D. All comments are public and related to specific designs. Teachers control the privacy settings and decide who students can interact with. The default is for school users to only interact with other school users, i.e. we know they are students on a school account.

... Working with your classmates

Sharing and editing designs

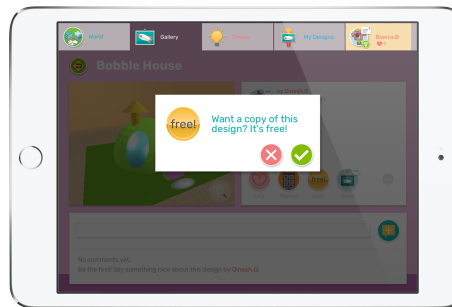

Collaborating on designs together is fun, and a great way to practise teamwork even if you're learning from home.

1. Share a design

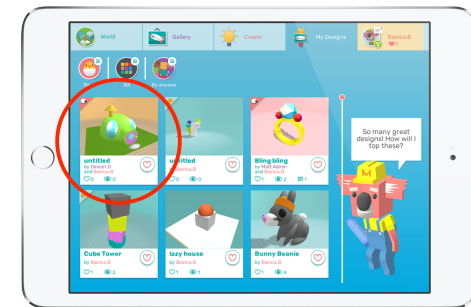

After you finish your design, set the **price to zero** so your classmate can get a copy easily. You can change the price later

2. Get a design

Use **Search** to find your friend's design, then click the **buy** button to get a copy. If your friend is kind it will be free.

3. Edit the design

You can find copied designs in **My Designs**. Just click on the design to start editing it and making it unique.

TIP! Use the same design title and add a version number so you can easily see how a design has evolved. For example, "Cool Design v1" > "Cool Design v2"
