

Social Distancing Challenges for Children #1

Make a Senior Citizen Smile

Think about someone you care about who can't leave the house at the moment and create a design to bring a smile to their face.

Does your grandma love to cook? Maybe you could create a design of you and your grandma baking a cake together.

Does your elderly neighbour love gardening? Why not create a new garden design for them?

Don't forget to have your parent or guardian send them the link to view your design in the Makers Empire gallery at <https://dash.makersempire.com/designs> (search for your username and then your design)

Social Distancing Challenges for Children #2

Boredom Buster

People stuck at home sometimes run out of things to do. Design an awesome invention for someone your age that'll keep them amused for hours.

What would your Boredom Buster do? How would someone use it?

Think about all the cool features it should have to keep someone like you entertained.

Social Distancing Challenges for Children #3

Favourite Outdoor Activity

Think about the outdoor activity you miss most or would miss most if you had to stay at home for some time.

Would it be going to the beach? Riding your bike? Playing basketball with your friends? Shopping? Going out for ice-cream?

Create a 3D design in Makers Empire to show you doing your favourite outdoor activity and then share it with your classmates.

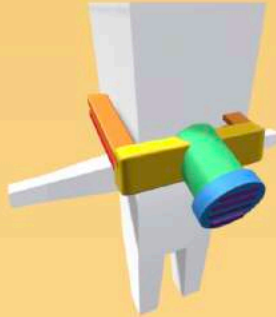

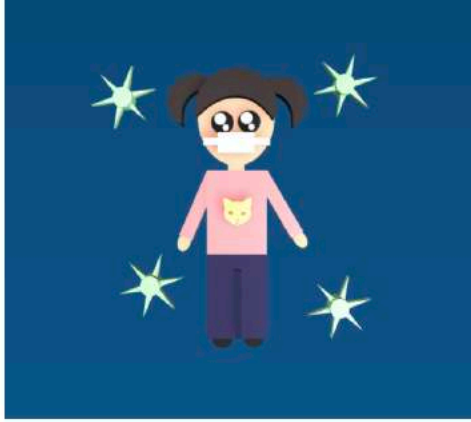

Social Distancing Challenges for Children #4

Fidget Spinner for Stress-Relief

A lot of people are feeling a bit worried right now. Design a cool fidget spinner that they can play with wherever they are to help them feel more relaxed.

Make your fidget spinner as decorative and as complicated as you like. What colours should it be? What shapes will you use?

Social Distancing Challenges for Children #5

Protective Suit

You may have seen people in your community wearing masks to protect them from spreading or catching the coronavirus.

Design an outfit for your Makers Empire avatar to help keep you safe.

A protective suit doesn't have to be boring - make your outfit look fierce!

Social Distancing Challenges for Children #6

BFFs 4 Ever

Kids at home are missing their friends. You might be one of them.

Design a special pendant for you and your BFF(s) that is designed to be split into pieces that can be worn on a necklace by each of you.

What shape should it be? What will you write on it?

Tag your BFF so he or she can see what you've made for them.

Social Distancing Challenges for Children #7

Cheerful Flowers

Do you know someone who is going through a particularly tough time right now? Maybe it's a friend or relative. Perhaps it's a neighbour or acquaintance.

Create a beautiful bouquet of flowers using Makers Empire's 3D design software for this person.

Don't forget to have your parent or guardian send them the link to view your design in the Makers Empire gallery at <https://dash.makersempire.com/designs> (search for your username and then your design).

Social Distancing Challenges for Children #8

Bedroom Pet

Being stuck in a bedroom is way less boring if you have a pet to keep you company.

Using Makers Empire, create a design of your dream pet hanging out with you in your bedroom.

What does your pet look like? What can it do? What does it eat and where does it sleep? What is its name?

Social Distancing Challenges for Children #9

Secret Package

Think about how to get a secret package delivered to a friend from your house without a living person touching it. How would you do this?

Would you create a robot? What about a rocket or helicopter? Could you create a mechanical pigeon to deliver it? Or perhaps a driverless car?

Using the Makers Empire 3D app, design something that will deliver your package to your friend.

Social Distancing Challenges for Children #10

Theme Parks

A lot of people love going to theme parks. Unfortunately, going to theme parks is one of the things that people in many countries can't do right now.

Using Makers Empire, design your dream theme park. What rides would your theme park have? What kinds of games and activities would it have for kids?

Make your theme park awesome and colourful!
