The Makers Empire 3D Design & Technology Program

An all-in-one solution for effective planning, teaching & assessment

From the Australian Curriculum

Why?

Design Thinking underpins learning in Design & Technology curriculum.

Primary and elementary school teachers around the world are increasingly being required to teach Design Thinking using current technologies to address curriculum demands.

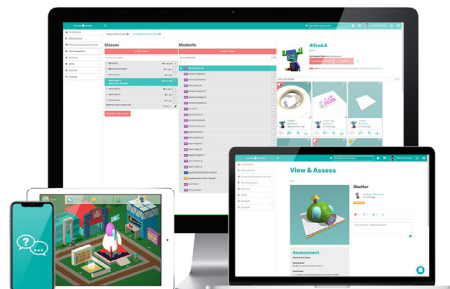

Teaching students Design Thinking helps them develop 21st century learning skills - Critical Thinking, Creativity, Collaboration and Communication - and an innovation mindset.

Our program includes...

Makers Empire 3D App

The world's most fun and easy-to-use 3D design software.

Teacher Dashboard

Effective planning, class management, and built-in assessment tools. Curriculum-aligned challenge paths and 150+ lesson plans.

Learning by Design course

Custom professional development using evidence-based maker pedagogies.

"As a school, this has been a game changer in the 3D design game for our students of all ages. This is a great design and creation tool that teachers and students can use to be innovative and share ideas with a vibrant community of makers. With Makers Empire, students learn how to identify needs and opportunities and then create, prototype, test and refine designs of solutions using 3D printing,"

Craig Kemp, former Head of EdTech at Stamford American International School, Singapore
